Pulpdent Pic-n-Stic: A Handle for Small Objects

WATERTOWN, MA: January 17, 2009— Pulpdent Corporation’s Pic-n-Stic is a novel product that consists of a 2-inch long plastic stick with an adhesive pad on the end. These disposable sticks act as small handles for picking up small objects that are difficult to manipulate with your fingers. The original “handle for small objects” has numerous uses in dentistry.

Pic-n-Stics provide better control when manipulating small objects in the oral cavity, where maneuvering room is at a premium. They can be used to pick up and place crowns and veneers or any other small objects. They are also ideal for handling gems or other dental embellishments. Once clinicians have used Pic-n-Stic, they wonder how they ever did without them.

Pic-n-Stics are available in boxes of 60. For more information, call 800-343-4342 or visit www.pulpdent.com.
