New Packaging Options for Flecta Disposable Mirrors

WATERTOWN, MA: December 20, 2008— Pulpdent Corporation is now offering its popular Flecta Disposable Mirror packaged in boxes of 200 mirrors, boxes of 100 mirrors, and boxes of 72 individually wrapped mirrors. Flecta mirrors allow the clinician to use a new, scratch-free mirror for every patient.

The Flecta mirror has an elongated shape with 40% greater viewing surface. Its light weight and comfort handle reduce stress and fatigue. The offset handle is a better cheek retractor and tongue guard than the standard handles on conventional mirrors. The ergonomic shape also makes it easier to position the mirror and provides a better view along the gum line.

The Flecta mirror is double-sided and features a back side light reflector. A pull tab allows the clinician to easily remove the layer of protective film that covers the mirror surface. It can be given to the patient after the procedure for home use, helping to reinforce follow-up care and good hygiene technique. For more information, call 800-343-4342 or visit www.pulpdent.com.
