THE BIOACTIVE DIFFERENCE
ACTIVA stimulates mineral apatite formation and natural remineralization at the material-tooth interface. This process knits the restoration and the tooth together, penetrates and fills micro-gaps, reduces sensitivity, guards against secondary caries, and seals margins against microleakage and failure.

NEW STANDARD OF CARE
ACTIVA is the first in a new generation of esthetic, durable, bioactive restorative materials that play an active role in maintaining oral health with release and recharge of significant amounts of calcium, phosphate and fluoride.

APATITE FORMATION SEALS AND PROTECTS TEETH
ACTIVA is a “smart” material that responds to pH cycles with release and recharge of its mineral components. It stimulates formation of a protective/connective layer of mineral apatite that is the defining requirement of bioactive materials.

ESTHETIC AND DURABLE
ACTIVA is a highly esthetic restorative that resists wear and chipping, and absorbs shock and stress forces like natural teeth. It is tougher and more durable than traditional restorative materials.

YOUR PATIENTS WILL THANK YOU
ACTIVA represents a proactive approach to dentistry that anticipates future oral health needs and emphasizes prevention and long-term patient care. Be proactive. Build your practice with ACTIVA BioACTIVE products.

NO BISPHENOL A
ACTIVA is safe for all patients. It contains no Bisphenol A, no Bis-GMA and no BPA derivatives.

PATENTED BIOACTIVE CHEMISTRY
Patented bioactive resin, patented rubberized-resin, and reactive glass fillers deliver an unparalleled combination of physical and chemical properties. ACTIVA is moisture friendly, dimensionally stable, dual cure and radiopaque.

FAST AND EASY TO USE
Automix syringe delivery, no sensitivity, indicated for Class I, II, III, IV and V restorations. Ideal for bulk filling.

The Future of Dentistry Now in Your Hands
ACTIVA 53-month Recall

1A December 2012
Shows prepared tooth after removal of old amalgam.
Courtesy of Dr. John Comisi

1B May 2017
53-month recall shows great esthetics, no wear or chipping, and no marginal staining.

ACTIVA 53-month Recall

Replacing Failed Composite with ACTIVA BioACTIVE-RESTORATIVE

3A shows 5-second etch. After rinsing, all excess moisture is removed.

3B ACTIVA BioACTIVE-RESTORATIVE is placed through bendable metal cannula.

3C Explorer is used to create anatomy.

3D Shows finished and polished restoration.
Courtesy of Dr. Mark Cannon

ACTIVA Physical Properties Outperform RMGIs and GIs and are Comparable to or Surpass Composites

ACTIVA BioACTIVE-RESTORATIVE™

ACTIVA BioACTIVE-RESTORATIVE™

Requirements ACTIVA-SPENSER™

VR*
- Starter Kit: 5mL/8gm syringe, ACTIVA-SPENSER™ + 20 assorted mix tips
- Starter Kit available in A1, A2 and A3 shade only

VR1*
- Single Refill: 5mL/8gm syringe
  + 20 assorted mix tips

VR2*
- Value Refill: 2 x 5mL/8gm syringes
  + 40 assorted mix tips
*Specify Shade: A1, A2, A3, A35 (for A3.5)

ACTIVA BioACTIVE/BASE-LINER™

ACTIVA BioACTIVE/BASE-LINER™

ACTIVA-SPENSER™ is optional

VB1
- Single Pack: 5mL/7gm syringe + 20 mix tips with bendable 20-gauge metal cannula

VB2
- Value Pack: 2 x 5mL/7gm syringes + 40 mix tips with bendable 20-gauge metal cannula

ACTIVA-SPENSER™

For 5ml 1:1 Automix Syringes

DS05 Dispenser for 5ml automix syringe

TIPS – APPLICATOR

A20N1 Automix Tips, clear, with bendable 20-gauge metal cannula – pkg of 20

A50N1 Automix Tips, clear, with bendable 20-gauge metal cannula – pkg of 50
For use with 2.5ml, 5mL and 10mL 1:1 automix syringes
